

PORTFOLIO 2024

Hello, I am Purva Patil

Motivated ENTC Engineering Student focused on Sensors, Robotics, and IoT solutions. Bridging hardware and software through innovation.

ABOUT ME

Bridging Hardware & Software

Who I Am

I am a results-driven first-year B.Tech student at MIT Academy of Engineering, specializing in Electronics and Telecommunication. My technical foundation is built on a deep curiosity for sensor technologies and electromechanical systems, particularly AC/DC motors.

Learning Journey

Currently focusing on mastering embedded C, advanced Python scripting, and deepening my understanding of automated systems. I believe in learning by doing, which is why I'm constantly building and simulating new circuit designs.

My Mission

I bridge the gap between theory and application by crafting intricate circuit simulations in Tinkercad and developing logic in C and Python. I am dedicated to pushing the boundaries of Robotics and IoT through continuous learning and hands-on innovation.

Beyond Engineering

When I'm not tinkering with circuits or writing code, I find balance through creativity. I am passionate about Dance and Drawing, which help me maintain a fresh perspective and drive my innovative thinking.

B.Tech in E.N.T.C.

CURRENT

FY 2024 - 2029 (Expected)

MIT Academy of Engineering

Currently in 1st Year, maintaining a 7.90 SGPA. Specializing in Electronics and Telecommunication Engineering with a focus on core circuit design and embedded systems logic.

CURRENT STANDING

7.90 SGPA Merit Score

HSC (Higher Secondary Certificate)

COMPLETED

FY 2023 - 2025

Shri Shivaji Vidya Mandir

Completed with 75.33%. Strong foundation in Physics, Chemistry, and Mathematics.

SSC (Secondary School Certificate)

COMPLETED

FY Completed 2023

Vidya Niketan School

Achieved 87.40%. Initial focus on general science and technical foundation.

SUCCESS STORIES

Automatic Obstacle Avoiding Robot

Built using Arduino, Ultrasonic sensors, and DC motors for autonomous navigation.

ROBOTICS

ARDUINO

SENSORS

Smart Water Irrigation System

Automated plant watering system using soil moisture sensors and solenoid valves.

Motion Detector System

Security system with PIR sensors and instant notifications.

Digital Doorbell Circuit

Compact digital signaling system with custom melody logic.

TECHNICAL STACK

Skills & Expertise

Bridging hardware and software requires a diverse set of tools. Here's the technology I work with every day to build better systems.

Python

LOGIC

High-level automation and scripting for IoT.

C Language

PROGRAMMING

Low-level logic for precise embedded systems.

Tinkercad

HARDWARE

Technical circuit design and logic in simulation.

Simulation

EXPERTISE

Validating complex electronic behaviors.

Get in touch

Have a project in mind or just want to say hi? I'm always open to discussing new opportunities.
